Summary

Dedicated Full Stack Developer with a passion for crafting seamless and dynamic web applications. Proficient in utilizing modern frontend and backend technologies to deliver robust and user-focused solutions. Skilled in designing responsive user interfaces, optimizing performance, and ensuring smooth interactions. Experienced in developing RESTful APIs, managing databases, and implementing scalable server-side architecture. Adept at collaborating within cross-functional teams to deliver high-quality code and meet project milestones. Continuously learning and adapting to stay current with industry trends. Committed to delivering innovative and impactful digital experiences that drive user engagement and business growth.

Experience

Plusone Technologies | Gurugram,Haryana
Full Stack Engineer | 11/2024 - Present

As a Full Stack Developer, I utilized the **NANStack** (Node.js, Angular, NestJS) on Ubuntu to build dynamic web applications while leveraging AWS services such as EC2 and S3 for scalable infrastructure and storage solutions. I integrated third-party APIs, including Signzy for identity verification and Interakt WhatsApp API for enhanced communication. My responsibilities included developing front-end interfaces with Angular, implementing server-side logic using Node.js and NestJS, and managing SQL databases such as PostgreSQL (or MySQL) for data handling and optimization.

I wrote complex SQL queries to ensure efficient data retrieval, management, and performance. Additionally, I leveraged AWS S3 for handling file storage and media management, while deploying applications on AWS EC2 instances for secure, scalable, and high-performance infrastructure. I collaborated closely with cross-functional teams to design, develop, and deploy key features, optimizing both backend and frontend architecture. My expertise in API integration, cloud infrastructure, and SQL database management played a crucial role in the successful launch of several features, greatly enhancing user experience and engagement.

Ascend Capital | RJ
Full Stack Developer | 03/2024 - 11/2024

As a Full Stack Developer, I leveraged the PERN stack (PostgreSQL, Express.js, React, Node.js) on Ubuntu to build dynamic web applications. I integrated third-party APIs, such as Signzy for identity verification and Interakt WhatsApp API for enhanced communication. My responsibilities included developing front-end interfaces with React, implementing serverside logic using Node.js and Express.js, and writing complex SQL queries in PostgreSQL to optimize data handling. I collaborated with cross-functional teams to design, develop, and deploy high-impact features, ensuring application performance and quality. My expertise in API integration and database management contributed to the successful launch of several key features, significantly improving user experience and engagement.

JK Teck Solution | RJ
Jr. Mern Stack Developer (Remote) | 12/2023 - 09/2024

As a Junior MERN Stack Developer, I played a pivotal role in the development of dynamic web applications, showcasing my expertise in React, Next.js, Express.js, TypeScript, and Vue.js. I successfully contributed to a Vue.js project and worked on the backend with Express.js, supporting a user base of over 1000 active users per day. In this dynamic and agile environment, I spearheaded the implementation of front-end solutions, elevating user interfaces to new heights. My dedication to excellence ensured the seamless integration of features, providing users with a top-tier experience.

EBO SOLUTIONS PRIVATE LIMITED | MH
Full Stack Developer- INTERNSHIP (Remote) | 03/2023 - 09/2024

As a key contributor to an e-commerce project, I specialized in managing complex application states through the use of Context API while demonstrating proficiency in developing intricate APIs and introducing stable functionalities. My responsibilities extended to working with MongoDB, Node.js, Express.js, and JavaScript, ensuring seamless integration and optimal performance for a substantial user base of over 1000 active users per day. My role encompassed the development of responsive and visually appealing front-end interfaces, employing technologies such as React, HTML, CSS, and JavaScript.

Skills

Next.js, React, Vue.js, JavaScript, TypeScript, Python, GraphQL, Express.js, MongoDB, PostgreSQL, Mongoose, Sequelize, Prisma, Node.js, Tailwind CSS, CSS, HTML, PostgreSQL, Postgres, Ubuntu, SequalizeORM, Material UI, SQL, React Native, Socket.io, Angular.JS
